Welcome

Congratulations! Your registration has been completed successfully.

Author dashboard

Your submissions: 0

Track progress of your submissions and upload revisions.

Your draft submissions: 0

Complete or delete your unfinished submissions.

Submit a new article

You will need the following:

- Title of journal you are submitting to
- Name, email address and institution for each author
- Name, email address and expertise description of your 4 experts (see author guidelines for details)
- Your article as a pdf file (if not possible, use Word format). Maximum file size is 8MB (high resolution images not required at this stage)

Don't forget that as your article will be peer reviewed, you need to **remove the names, email addresses, affiliations and biographical**

notes of all the authors as well as any acknowledgements from the content of the article. You should still keep **the title, abstract and the keywords.**

If this is not done, approval of your submission will be delayed.

You can save your partly completed submission and finish it later - find it in **Your draft submissions** section above.

If you want your article to be Open Access, you will be able to select this option after your article has been accepted for publication.
